

MovieTech extends its range of products and services

Turnkey planning and solutions for stage and studio engineering

Munich, May 2010

MovieTech AG further extends its range of products and services in the field of studio and stage engineering by adding a complementary company to its already held MTS Media Technical System company. Thanks to the acquisition of former "Lastro Technische Systeme", the MTS suspension systems can now be integrated with a compatible rail system. The planning and consulting for studios and stages will from now on be provided by the newly founded company Lastro Engineering. As a result, MovieTech now offers turnkey solutions for studio and stage engineering under the same roof: from sales to consulting and planning through to installation.

Brief profile of Movie Tech / ABC-Products / MTS / Lastro Engineering:

MovieTech is based in Munich with subsidiaries in Milan and Prague. As one of the leading manufacturers in its field, it produces and markets products and solutions for the film industry. The MovieTech product range concentrates on the areas of: camera cranes, dollies, lighting systems, remote heads and corresponding accessories. The products marketed under the ABC-Products name cover the entire range of extremely lightweight and high-quality equipment for the video, HD and broadcast sectors.

The mission of Movie Tech is to manufacture professional film equipment that not only considerably simplifies the work of those using it on the set or in the studio, but also facilitates the implementation of creative ideas.

At the end of 2006, MTS Media Technical System was taken over and integrated into the MovieTech portfolio. The brand stands for first-class studio equipment, including drop-arms, pantographs, lighting rigs, telescopes and rail systems. Lastro Engineering was taken over in April 2010. The company offers planning, consulting and stage engineering as well as installation.
