We proudly add the brand new GIZMO Jib to our Jib family. It offers the perfect combination of versatility, reliability and stability in a high quality crafted package.

Our new Gizmo Jib is a true all-rounder. Compared to other jib arms in its class, it has convincing advantages:

Always the ideal jib length: modular interchangeable front segments with 0.25 m and 0.5 m as well as a telescopic front segment with 40 cm extension allow for any desired length between 0.5m and 2.5m (and beyond).

Perfect balance: the rear section of the GIZMO jib can be freely extended by up to 33 cm using a hand crank, without being restricted to predefined positions.

Robust and stable: strong brakes in all movement axes, hard-coat surface and backlash-free connection between all segments.

Every shot counts – with the new Gizmo camera jib there are no limits to your creativity on set.

VERSATILE AND MODULAR

Ever found yourself shooting a scene and thinking, “If only my jib could stretch just a tad bit more!”? Well, Gizmo Jib has got you covered, and in the most customizable way possible! Gizmo’s telescopic front segment and a 40 cm extension, you can effortlessly dial in any desired length between 0.5m and 2.5m (and beyond). Need a precise length? No problem. Gizmo’s got 0.5m and 0.25m segments, so you can tailor it to the perfect size for your filming needs.

1301-2100SET

1301-2200SET

The crankable rear part ensures that you can reach the perfect balance for any front length.

You only need the main part, front telescopic segment, and those two little segments, and voila! You’re ready to film from any angle, any length.

The Gizmo Jib is not just modular and versatile; it’s also a filmmaker’s new best friend.

FACTS

Ever fumbled with a fascinating contraption and been at a loss for its name?

You’ve likely dubbed it a “Gizmo,” that catch-all word for those perplexing yet captivating gadgets that often baffle our tongues. Whether mechanical or electronic, a Gizmo’s charm is in its mystery, and with a name as quirky as its function, you’ll find it’s a term – and a tool – you’ll never forget!

ERGONOMIC AND LIGHTWEIGHT

Looking to set up a jib without the fuss of a thousand complex parts? Enter Gizmo Jibs, High-quality elements that easily snap together and can be assembled with ease; making the Jib go from Baby-size (S) to furthest reach (L) within seconds

The jib's main part weighs in at a mere 24,5 kg, so the S Version can be moved around by just one person – and we mean easily, not “lifting a couch up a narrow staircase” easily. Need to take on more weight? With a max jib weight of 40 kg, this jib is as versatile as a Swiss army knife, without the need to leaf through a 500-page manual. Now, go on, and let the Gizmo Jib flex those filmmaking muscles.

MovieTech

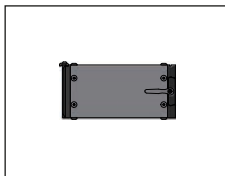

STORYTIME

Sign of the master

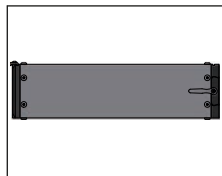

The Gizmo logo: You see, those swanky G and J letters aren't just any old scribbles; they're hand-written by our main engineer. That's right, he himself put pen to paper, giving you a personal touch with every glance at the logo. It's like a celebrity autograph right on your equipment. Some artists use brushes; others use chisels, but Gizmo? They prefer the artistic flare of an engineer's handwriting.

STRONG AND STABLE

Brakes, brakes, and more brakes – Gizmo Jibs sure knows how to stay put! The jib offers double side pan and tilt brakes that keep everything perfectly in position.

We've added brakes to the base, rear part, and head, ensuring that nothing goes down with the movement.

And that locking lever? They're making sure everything stays right where it should.

The locking system isn't just an add-on; it's the steadfast friend that ensures stability through thick and thin. All segments are backlash-free connected.

GERMAN QUALITY IN EVERY DETAIL

We stick to the "Made in Germany" quality promise in every part of our products:
from the biggest elements to the smallest accessories

The HARD-COAT surface treatment, is a weapon against the wear and tear of everyday filming. Imagine a protective shield that guards against scratches.

Like all other MovieTech products, the Gizmo Jib is all "MADE IN MUNICH", in our own factory here in Germany.

Let´s get serious: no compromise on quality.

Lightweight aluminum, stainless steel details, quality ball bearings in every axis. From the bracing rod to the smallest screws, every part is all about reliability and longevity. No rust, no fuss, just pure efficiency. - good old German engineering.
